

AIMS – Asset Inspection and Maintenance Services

AIMS is a company that delivers budget, strategy, inspection and reporting tools for facility owners for the mining, metaliferous processing, ports, agricultural and construction sector.

AIMS delivers effective protection of valuable assets by providing a tailored maintenance plan covering the all areas of corrosion and erosion management of your facility. AIMS ability to optimize maintenance budgets and enhance productivity helps reduce maintenance spend over the life of your assets.

An impeccable safety record and reputation for reliability and professionalism are among AIMS hallmarks which have contributed to its overwhelming success today.

Services and capabilities include:-

AIMS personnel will come to your facility and conduct a detailed survey on all your plant and equipment needing attention. A detailed written report will be supplied at the completion of the inspection, along with the specific photos and explanations of the targeted items in question.

AIMS personnel will put together budgets for both the detailed survey and the Priority Lists and Recommendations. These can then be utilized and submitted for the upcoming financial year or used as a guide for the painting project at hand. The all new planning tool that we have developed will cater for group of companies or a individual facility or a combination of facilities.

The AIMS system provides you with a comprehensive maintenance program to change corrosion and erosion mitigation procedures from a **REACTIVE** status to a **PREDICTIVE** status, optimizing maintenance budgets and enhancing productivity to effectively reduce maintenance spend over the life of the asset.

Our management structure consists of inspectors through to project managers to cater for the largest of projects.

Our company maintains safety is paramount followed by environment, quality, and productivity.
