

DMS Engineering – Fabrication & Machining

DMS Engineering provides tailor-made solutions that meet customers' precise requirements, through developing better, more cost-effective methods of achieving engineering solutions. Our skilled team of dedicated staff and tradespeople offer vast experience in all engineering disciplines, producing components of the highest quality

Services and capabilities include:-

Gladstone Operations

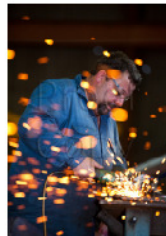

Known for its dependability, quality workmanship and quick turnaround we are an integral supplier to companies such as Queensland Alumina, Boyne Smelter Limited, NRG Gladstone Operations, Rio Tinto, QLD Cement, etc..

Services include the manufacture of high-tolerance machined products, CNC turning and milling, machining of dies, moulds and castings, specialized fabrication (up to 100tn), light to heavy stainless steel spec. alloys, repair and reclamation of components utilising robotic welding, metal spraying, pressing, rolling, forming and welding.

Mackay Operations

Our Mackay operations offer a diverse range of services including heavy fabrication, design, CNC profile plasma/oxy cutting and specialized product manufacturing for the mining and associated sectors in the sector.

As a key supplier to customers such as BMA, Anglo Coal, Xstrata Coal, P & H Minepro, Atlas Copco our Mackay operations services include Dragline components, walkway systems, conveyor / chute systems, ventilation doors and many components used in underground mining applications.
