

DMS Underground – Mining Hire

DMS Underground's Mining Hire Division provides a full range of machinery for hire to the mining industry in both Queensland and New South Wales. The current fleet of over 37 machines includes utility vehicles, LHD's, personnel transporters, graders, drilling rigs, stone dusters, work platforms and various attachments.

Services and capabilities include:-

Recently DMS has added ten Atlas Copco Coaltrams to its growing Fleet. These comprise of eight Coaltram CT10's and two Coaltram CT13's, which are ten and thirteen ton capacity machines respectively. This has been bought about to meet the growing requirement of the Casual Hire market in the industry as well as to provide an opportunity for Customers to experience the new benchmark in underground utility vehicles prior to purchasing.

DMS delivers professional and efficient service and quality machinery, maintained to a high standard. The machines and attachments are available on long and short term hires.
